

WE GIVE YOUR DREAM OF FLUENCY A VOICE!

FLUENCY FIX

■ Virtual Language Practice Founder: Carol Barrett

What if foreign languages could be practiced in a virtual environment without traveling to a foreign country or without spending a lot of money? This is the question Fluency Fix's founder posed when she couldn't find anyone to practice Japanese with in her hometown of Brampton, Ontario.

This simple wish, to give language learners the daily speaking practice that they so desperately need, has now become a reality with Fluency Fix. The curriculum for each language includes 365 interactive, on-demand conversation practice sessions with a native speaker. Every session also includes a quick mini-lesson to make sure that you really understand the conversation. Improving at a foreign language without regular speaking practice is impossible and now with Fluency Fix, the "I don't have anyone to practice with" excuse is gone forever.

Why is Fluency Fix different?

We let you speak. With every other online foreign language training program, you're watching someone else talk. You're watching an instructor speak. You're clicking on pictures. You're watching a video with your mouth closed the entire time. You're doing listen and repeat exercises that take place outside of a back and forth conversation setting. You're taking a quiz. You're typing answers. At Fluency Fix, we believe that fluency happens when your mouth is open, moving and having a conversation. So, after your mini-lessons, we give you a chance to **talk** and **practice** as much as you want. What else make us different? Due to our commitment to access to education, all 65 of the beginner lessons in each language are free!

365 conversations for every stage of your language learning journey

Beginner

Our beginner curriculum includes 65 beginner and travel conversations covering introducing yourself, shopping, asking for directions, numbers and more.

Intermediate

This intensive conversation workout covers 200 conversations from 20 grammar categories. Language learners will have the opportunity to practice ten conversations per grammar category.

Business

Our business conversations cover a wide variety of business topics including customer service, banking, sales, insurance, loyalty programs and most importantly, the job interview!
